

WRI INDIA

INTERNSHIP – CLIMATE, WRI INDIA

The Person We Are Looking For

The intern we are looking for will help us design and update the Climate data country platform for India, which is a part of the global Climate Watch platform. The Climate Watch is a powerful new platform that offers comprehensive data for Climate action. The India platform is expected to make available critical information on Climate and Energy relevant policies available on a single platform, thus enhancing transparency.

The intern will also help with data collection and analysis for the Energy Policy Solutions (EPS) model for India that helps policymakers identify and implement efficient and cost-effective policies to accelerate our path to a low-carbon future.

What is WRI?

World Resources Institute (WRI) is an independent, nonprofit global research organization that turns big ideas into action at the nexus of environment, economic opportunity and human well-being. We are working to address six critical challenges that the world must overcome this decade in order to secure a sustainable future for people and the planet: climate change, energy, food, forests, water and sustainable cities. Founded in 1982, WRI has a global staff of nearly 700 people with work spanning 50 countries. We have offices in Brazil, China, Ethiopia, Europe, India, Indonesia, Mexico and the United States.

The foundation of our work is delivering high-quality research, data, maps and analysis to solve the world's greatest environment and international development challenges, and improve people's lives. We work with leaders in government, business and civil society to drive ambitious action and create change on the ground. Equally important, we bring together partners to develop breakthrough ideas and scale-up solutions for far-reaching, enduring impact.

The World Resources Institute India (WRI India) is an Indian environmental organization with experts and staff who work closely with leaders to turn big ideas into action to sustain a healthy environment – the foundation of economic opportunity and human well-being. WRI envisions an equitable and prosperous planet driven by the wise management of natural resources, and aspires to create a world where the actions of government, business, and communities combine to eliminate poverty and sustain the natural environment for all people.

WRI India aims to help solve the four most urgent challenges in India – rapid urbanization, the increasing demand for energy, responding to climate change and the large-scale degradation of natural resources. Over 75 experts and staff across three office locations – Mumbai, Bangalore and Delhi – deliver these ambitious goals. WRI India is supported by WRI's international offices, to ensure that the global organization's experience can be brought to bear within the context of India. WRI India has the capacity to convene key stakeholders, and forge strategic partnerships with governments, business, foundations, civil society organizations, institutes and NGOs, to scale-up solutions that can bring game-changing results for the sustainable management of natural resources in India.

Responsibilities

The intern will undertake and oversee a range of responsibilities for the climate team as listed below:

- Track the progress of a diverse range of mitigation relevant climate and energy policies in a consistent manner
- Facilitate the detection as well as offer insights into the reasons for implementation success or failure, thus indirectly facilitating the resolution of implementation risks and barriers.
- Provide inputs in terms of suggestions for developing milestones, indicators, and tracking plans
- Make available critical data to assess the mitigation impact of policies/plans and thus enabling determination of whether a policy or plan's intended GHG reductions are being achieved
- Provide support with analysis using the India EPS model as well as coordinating the launch workshop

Qualifications and Skills

- Education : Graduate degree in engineering or science
- Technical expertise : Preferred familiarity with the climate or energy domains
- Years of experience : Not specific
- Skill set : Research and analysis skills
- Specific Knowledge required: Preferred knowledge of climate and energy issues
- Competencies/ Abilities required: Literature review, report writing, communication skills

Duration: 4 months

Location: New Delhi, India

To Apply: Qualified applicants should apply online at <https://jobs.jobvite.com/wri/job/oaND7fwr>. All applications must be submitted online through this career portal in order to be formally considered.

Only selected applicants will be contacted for interview purpose.

Please attach the following documents :

- Cover letter explaining how your academic background and skills meet the requirements of this position.
- Curriculum vitae of no more than 2 A4 sized pages detailing academic and relevant professional experience.
- A sample of research based writing that demonstrates analytical capabilities. This could be a paper or a dissertation chapter.

As an Equal Opportunity Employer, it is WRI's policy to recruit, hire, and provide opportunities for advancement in all job classifications without regard to race, color, religion, sex, national origin, age, citizenship, marital status, sexual preference, parental status, or disability. WRI's global agenda requires a staff that is diverse – with respect to race, gender, cultural, and international background. Diverse perspectives and experience enhance the way WRI selects and approaches issues, as well as the creativity and applicability of WRI's policy research and analysis. WRI, therefore, encourages applications from U.S. minorities, persons from other countries (especially developing nations), and from women of all backgrounds.
